

# TEAMS

## TEAMS Bookings

TEAMS Bookings includes Property Management System (PMS) and Channel Manager integration. Bookings are processed, payment method validated and funds banked with an automatic updates returned to the PMS, saving time and streamlining the booking process, completely eliminating wasted time with repetitive data entry and manual, error-prone processes to update the PMS. A number of reports are available in this element, including: an Online Travel Agent (OTA) effectiveness report, as well as financial and operations reports.

TEAMS Bookings includes alerts for reservations and front of house, as well as high-quality booking confirmations.

The element also includes online pre-check-in and automatic electronic registration cards for guests.

TEAMS-Bookings is available as a bundled package with systems from our PMS/Booking Engine/Channel Management Partner network.

The system supports several popular PMS's including Protel, Semper, InnKey, Djubo, Axisrooms, KW Hotel and Gracesoft.
