TEAMS

TEAMS **Compliance**

TEAMS Compliance is fully PCI DSS compliant. This reduces your own PCI compliance requirements by up to 90%. PCI Compliancy for accommodation providers is mandatory, and yet to satisfy the complete requirements for PCI DSS can be very difficult.

Our system substantially reduces your efforts to become PCI compliant. The hard work is taken away from you, saving you time and money, and ensuring you can focus on running your business.

Most providers do not have the technology infrastructure, staff or ability to sustain some of the processes, whilst still trying to operate a business.

TEAMS Compliance ensures that all your customer card data is stored safely and fully protected in accordance with applicable laws, rules and regulations.
